Nitin Chander

+91-8130489303 | nitinchandra834@gmail.com | linkedin.com/in/nitin-chander-b6928120b

Professional Summary

Computer Science & Engineering student with hands-on experience in Python development, backend engineering, SQL, machine learning, NLP, and Generative AI. Experienced in building end-to-end data pipelines, ML systems, RAG applications, REST APIs, and AI-enabled backend workflows. Seeking opportunities in AI/ML Engineering, Data Science, Generative AI, AI Engineering, and Python Development.

Education

Maharaja Agrasen Institute of Technology (GGSIPU) 2023 – 2027
B.Tech in Computer Science & Engineering *CGPA: 8.0*

Mukherji Memorial Sr. Sec. School 2023
Class 12 (PCM) *Score: 80%*

Technical Skills

Languages: Python, SQL
Data Science & ML: Pandas, NumPy, Scikit-learn, XGBoost, Statistics, Feature Engineering, Model Evaluation
Core Subjects: DSA,DBMS,CN,OS,System Design
AI & GenAI: NLP, Transformers, LLMs, RAG, LangChain, Hugging Face, Prompt Engineering, ChromaDB, FAISS
Backend & APIs: Flask, FastAPI, REST APIs, JWT
Databases: PostgreSQL, MySQL, SQLAlchemy
MLOps & Cloud: MLflow, Docker, AWS (EC2, S3)
Tools: Git, GitHub, Postman

Experience

IDEMIA Jun 2026 – Jul 2026
Python Developer Intern

- Engineered Python-based modules for AI-ready data ingestion and processing pipelines.
- Built SQL-driven data pipelines using Pandas and NumPy to clean, transform, and structure large datasets.
- Implemented NLP and RAG-enabled backend workflows to support intelligent document processing.

Paytm Jul 2025 – Aug 2025
Backend Developer Intern

- Developed scalable backend services using Python, SQL, and REST APIs to support core business workflows.
- Designed and implemented REST API endpoints for efficient request handling and database interactions.
- Architected AI-ready backend workflows to support automated data processing and downstream analytics.

NTPC Jul 2024 – Aug 2024
Backend & Database Intern

- Optimized SQL queries to improve data retrieval and reporting workflows.
- Automated backend data processing tasks using Python and SQL, reducing repetitive manual effort.
- Improved database query performance through indexing and query restructuring.

Projects

LearnForge – AI Learning Platform
Python, Flask, PostgreSQL, REST APIs, JWT

- Architected a modular Flask backend with PostgreSQL for a production-style learning platform, including user progress, badges, notes, and learning content.
- Implemented JWT-based authentication and REST APIs for secure data access and learning content delivery.

AI Travel Concierge
Python, LangChain, ChromaDB, Gemini API, RAG

- Developed a conversational AI travel assistant using RAG, LangChain, and Gemini API to generate context-aware responses.
- Implemented semantic search with ChromaDB and vector embeddings, with conversational memory for multi-turn interactions.

End-to-End Fraud Detection System
Python, Pandas, Scikit-learn, XGBoost, FastAPI, MLflow

- Developed an end-to-end fraud detection pipeline with data preprocessing, feature engineering, and class-imbalance handling.
- Compared Logistic Regression, Random Forest, and XGBoost using Precision, Recall, F1-score, and ROC-AUC.
- Deployed the trained model through FastAPI and tracked experiments using MLflow.
